

Uniqueness of Being

The Human Design System Is a blueprint of your genetic code.
 With **Human Design Analysis** your **genetic code** can be deciphered in detail.

This system is a revealed science and is founded upon logic, and logic is substantiated upon the repetition of patterns, something to be experimented with not a belief system. At the moment of birth we are imprinted with a **genetic blueprint** that is a unique expression of ourselves and like no other. Understanding this can be quite liberating and something inside of us can deeply surrender allowing our true inner essence to emerge. It is never too late to begin to live the life that is here for **You**. It truly is that simple..

Type & Strategy

Type is the most important aspect of Human Design and is derived from definition in the **Body Graph**. Knowing your type enables you to begin the process of knowing yourself and becoming aware of your strategy. This strategy is not a philosophy but a behavior based on your design. It is the awareness of the way our being works at the genetic level. To live our strategy is to live a life of peace and balance bringing fulfillment within our relationships and all areas of our lives and eliminating resistance to our authentic selves. There are **four basic types** and **one sub-type**. Learning your type and strategy is where Human Design analysis begins.

Which Type Are You?

Manifestors

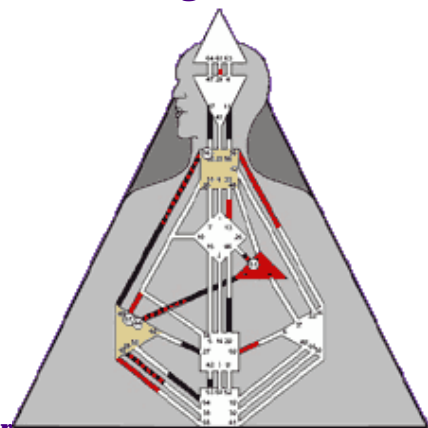

The **Manifestor** is somebody whose **throat center**, the center of metamorphosis is connected to one of three motors in the body graph. The small triangle in the middle is the heart center (the ego, will power), the triangle to the far right is the solar plexus (the emotional system) and the square at the bottom of the chart is the root center (the adrenal pressure).

The fourth motor above the root is the sacral center (the primary life force energy) this must remain open to be a manifestor. The manifestor is quite rare and encompasses only 8% of the world's population.

We all dream of being manifestors in this life as it is the most desired result we seek. Go forth and manifest!

We are raised from an early age to manifest on command. This is of course where we are hurt the most and taken far from our true nature. The truth is for the manifestor when they were children and did manifest (take action) they were usually disciplined for it. They often grow up with anger at the resistance they have received. We all love the energy of manifestors and you will often find them in roles of leadership and at the center of life as their constant access to productive energy is highly in demand, in ancient times they were the rulers of our societies.

Generators

A **Generator** is somebody with a **defined sacral center** and an **undefined throat** or a **defined throat that does not connect to a motor**. A pure generator is one of the most **powerful** types of designs and one of the most common representing 37% of the population. A generator has a tremendous amount of energy and power with no direct access to its expression. The strategy for a generator is to respond from their sacral the source of pure life force in a Human Being. There is nothing more powerful than a generator who waits to respond in life. If they initiate they will meet resistance from the world, which invalidates their use of this precious energy. A **Generators** power can be detected so easily once you step into their aura. They are like an incredible magnet pulling towards them what is in resonance with who they are and their powerful capabilities. You cannot resist a generator that knows the beauty and power of their waiting.

This is where the experiment begins. Once they feel secure enough to wait and respond it is the beginning of your healing and access to the greatest power on earth (receptive power). You see no one can have access to you when you know your strategy and wait to respond. This response is your true voice coming from your sacral not your throat and it has a very different sound since it is not with words but energy. It sounds like "unh-huh" for a yes and "un-ah" for no.

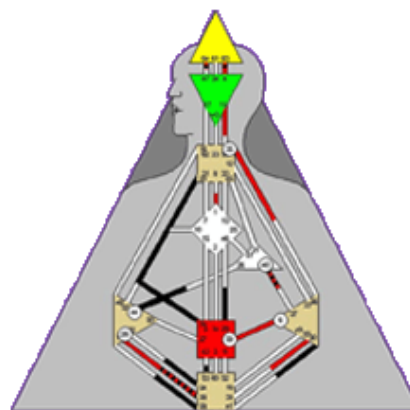

You can imagine that generators are the most vocal of all of the types their primal sounds can always be recognized in lovemaking and while enjoying their favorite cuisine. The world was built on the backs of generators as they have historically been enslaved and used it is now time to liberate these incredible forces and empower them.

A **generator** only knows what is correct for them when they are responding, this sacral response will guide them to the right career the right lovers and the right relationships, They are destined to a life of frustration when they have **no awareness of response** to release this magnificent energy. **Patience** is the key! A **generator** has the **easiest path to awakening and self-awareness** or **enlightenment** in this life, simply through **response**. Great career options for a generator are anything that they have responded to, anything! Once a generator responds their motors will take them anywhere. **Famous Generators: The Dalai Lama, Julia Roberts, Madonna, Albert Einstein, Walt Disney, Elvis Presley, Dustin Hoffman, Mozart, Luciano Pavarotti, Cleopatra, Stuart Wilde**

Manifesting -Generators

John F. Kennedy Jr. - Manifestor Generator

Grof, Mother Theresa, Bruce Lee, Arnold Schwarzenegger, Vincent Van Gogh, Friedrich Nietzsche.

A **Manifesting Generator** is our **sub-type** as it is a combination of a manifestor and a generator. They have a defined sacral and a motor connected to the throat. Their strategy is to wait and respond once they have responded they can take action immediately. Manifesting Generators make up 33% of our population. As in the generators strategy when they wait and let life come to them is when they access the magic and power within.

Projectors

Projectors are what we call the **non-energy types**. This means they have definition that is not connected to the sacral and a throat center that is not connected to a motor. Projectors are one of the most important types as they are here to recognize who has the energy to get things done in this life and manage it, but they are not here to do it themselves, they are the great delegates in life and potential masters of energy representing 21% of the world's population.

Projectors have a deep **need to be seen and recognized by others**. In fact their gift is in attracting others so that they get the energy needed in life to operate effectively. The key for them to realize is that recognition first begins within by **knowing their design**. Once this is understood they can have the confidence to wait and let their aura do the talking. Their strategy is to wait for an invitation, not just any invitation but the one that is perfect for them based on their authority, (remember this is that reliable place within them where decisions are made). **Personal success and fulfillment** comes when they are recognized by the right forces and invited. In fact this recognition can potentially fuel them for a lifetime.

When they jump and initiate in this life they risk exhausting their energies and meeting the resistance of the other, which can be a source of much imbalance. **To trust** in the **wisdom** and magic of their silence is where they can find their fulfillment and strength.

The greatest gift you can give a projector is to really see who they are.

The most successful relationship a projector can have is, with one of the (2) energy types. Great career options for a projector can be someone who works with energy as a Feng Shui practitioner an artist or any form of management and organizing of energies.

Reflectors

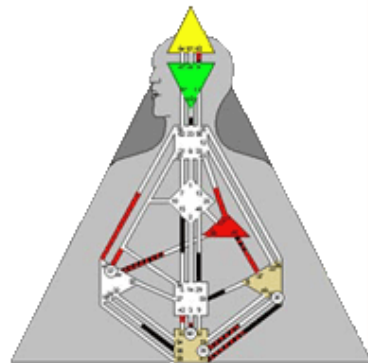

Reflectors are easy to determine when looking at a chart since they have essentially no definition all of their centers are white. **They are statistically 1% of the population**. The other designs are all solar types, which receive a generalized imprinting from the sun. The **Reflector** is the only lunar type purely reflecting the light of the moon on earth. They are moon beings and are governed by the 28 day cycle of the moon. They operate at a different frequency than the rest of us. They are usually **very intelligent individuals** as they take in the unique geometry of life through their open design there is nothing fixed within them to limit their experience of life.

Reflectors are filled with a sense of wonder about life and often feel invisible. They're biggest question is: **Can I be myself?** It is in that 28 day cycle of the moon that a reflector can truly discover themselves. Since the moon is the one constant in their lives their strategy is to wait out that cycle before making major decisions. It is important that we love and nurture them as they reflect so much back to us that we can learn from. It takes courage to stand in the presence of a reflector since what you get back is yourself! A **reflector** is most compatible with a manifestor as the strength of the consistent manifesting aura helps them to metabolize and feel secure.

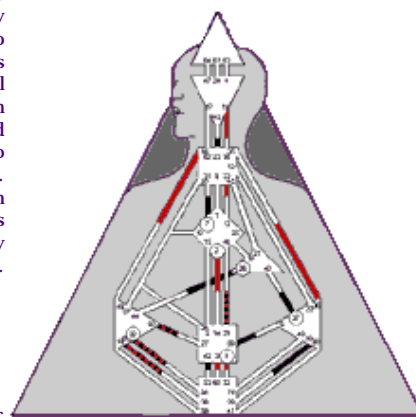

They are usually attached to their parents the original stable auras in their life and then later to their children. You will often find reflectors surrounded by an entourage.
